

Blooming Doilies

You will need:

Crocheted doilies

Wire floral stems or other sturdy wire

Floral pins (you may also use hot glue if you do not want to use the doilies for another purpose later)

Instructions:

1. Fold the doily over upon itself on one edge until you have a horizontal strip.
2. Roll the strip upon itself to form a coil.
3. Carefully separate the folds of the coil to more closely resemble a flower.
4. Using floral pins (or hot glue), secure the bloom in place.
5. Insert a wire floral stem into the bloom.

EveryStep Giving Tree has a large selection of vintage doilies like the ones we used for our project!
